DIAMOND SEAL™

PRL's Diamond Seal™ coating protects your shower and bath, keeping glass bright, clear, and easy to maintain. It resists stains and discoloration from limescale and hard water and reduces cleaning time in half with just a squeegee.

For proper care, follow the coating manufacturer's cleaning instructions.*

BENEFITS

- Keeps shower glass panels looking new
- Simple maintenance
- Seals glass surface to prevent stains, fingerprints & more
- Stays clean for longer
- No more harsh chemicals

EASY-TO-CLEAN SURFACE TREATMENT

UNTREATED GLASS

TREATED GLASS

*Diamond Seal isn't self-cleaning but shields glass from harsh chemicals and minerals.

HARDWARE FINISHES

Polished Chrome

Brushed Nickel

Matte Black

Oil Rubbed Bronze

SHOWER GLASS (PERMANENT COATING)

Unlike sprayed-on coatings, Shower Glass coating is fused to the glass during manufacturing, sealing the surface for a lifetime of protection. With regular maintenance, shower enclosures will keep their beauty and clarity for years.

Lab tests placed Shower Glass and uncoated glass in a “jungle box” to simulate years of heat and humidity. After only 175 hours, uncoated glass showed haze and staining; proving that Shower Glass stays cleaner, longer.

EASY-TO-CLEAN SURFACE TREATMENT

UNCOATED GLASS

PERMANENTLY COATED GLASS

Our complete shower systems accept 3/8" and 1/2" glass thicknesses.

While we offer various glass types, Clear and Low-Iron remain the most popular choices. These options are suitable for all shower applications, including swing door enclosures, shower sliders, steam units, and partitions.

RUBY SHOWER SLIDERS

This frameless shower slider incorporates 1" diameter support bar, which structurally attaches to adjacent sidelites or walls allowing for a smooth, reliable operation.

FEATURES
