³Comparison of U-factor values of a flush-glazed full-lite door and a Lip-lite full-lite door, both with Low-E glass.

During manufacturing, double- or triple-pane glass is built directly into the door. This design eliminates the need for a lite frame and screw plugs, achieving a seamless, consistent finish. Flush-glazed glass expands your view by 16%¹ — choose flush-glazed glass for more natural light and a sleek, uninterrupted aesthetic.

Lip-Lite Frame

DURABLE BY DESIGN

Intentional design for exceptional performance — sleek flush-glazed glass provides increased protection against air and water infiltration.²

Superior Sound Dampening

Doors with flush-glazed glass do a better job of dampening outside noise compared to a Lip-lite alternative.

11% More Energy Efficient

The Low-E glass used in flush-glazed doors delivers a clear view and is 11% more energy efficient than ½" Low-E glass in a Lip-lite frame.³

Withstands Winds Up to 167 mph

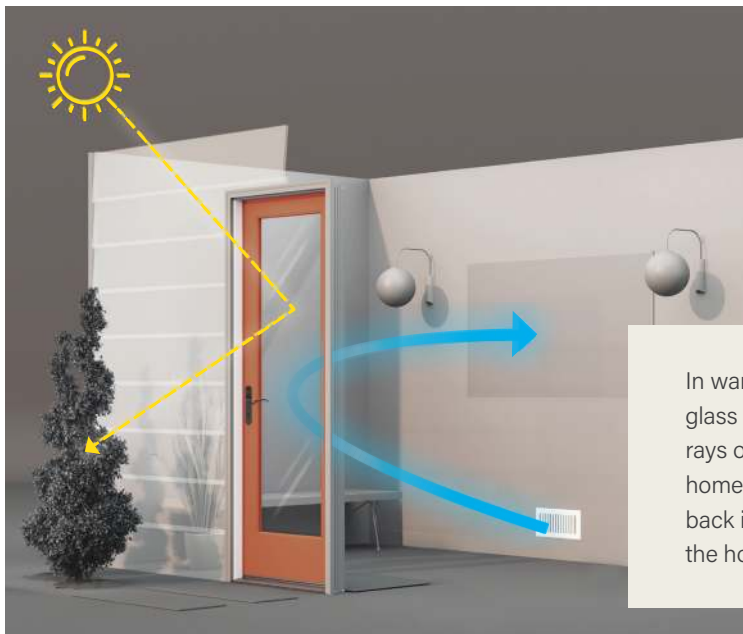

Door systems with flush-glazed glass are designed and tested to withstand wind forces up to 167 mph (DP-50).⁴ (ASTM-E330)

Year-round comfort, no matter the weather.

Factory-coated Low-E glass features a thin layer that reflects infrared and ultraviolet (UV) light, helping deliver exceptional energy efficiency.

In cold weather, Low-E glass reflects a home's heat back inside to help keep the home warm.

In warm weather, Low-E glass reflects the sun's rays off the glass and a home's air conditioning back inside to help keep the home cool.

Select flush-glazed configurations are now available with triple-pane Low-E clear and privacy glass options to meet ENERGY STAR® requirements indicated in gold starting on page 11.

Note: See your Therma-Tru seller or visit thermatru.com for details on ENERGY STAR qualified products.
